

Python:

- Capable of being an OOP language
- NOT exclusively an OOP language

Functions:

Organised code

Easier facilitation of teamwork

Easier to support

Prevents duplication

• Functions can be inbuilt or user-defined

Import:

① from file import func_1
- Specific Import

② import file as fl
- Import entire file
- fl.func_1 calls function in file

Docstrings:

name_of_func.__doc__ gives the docstring
